Oasis
Sorting Logistics Software
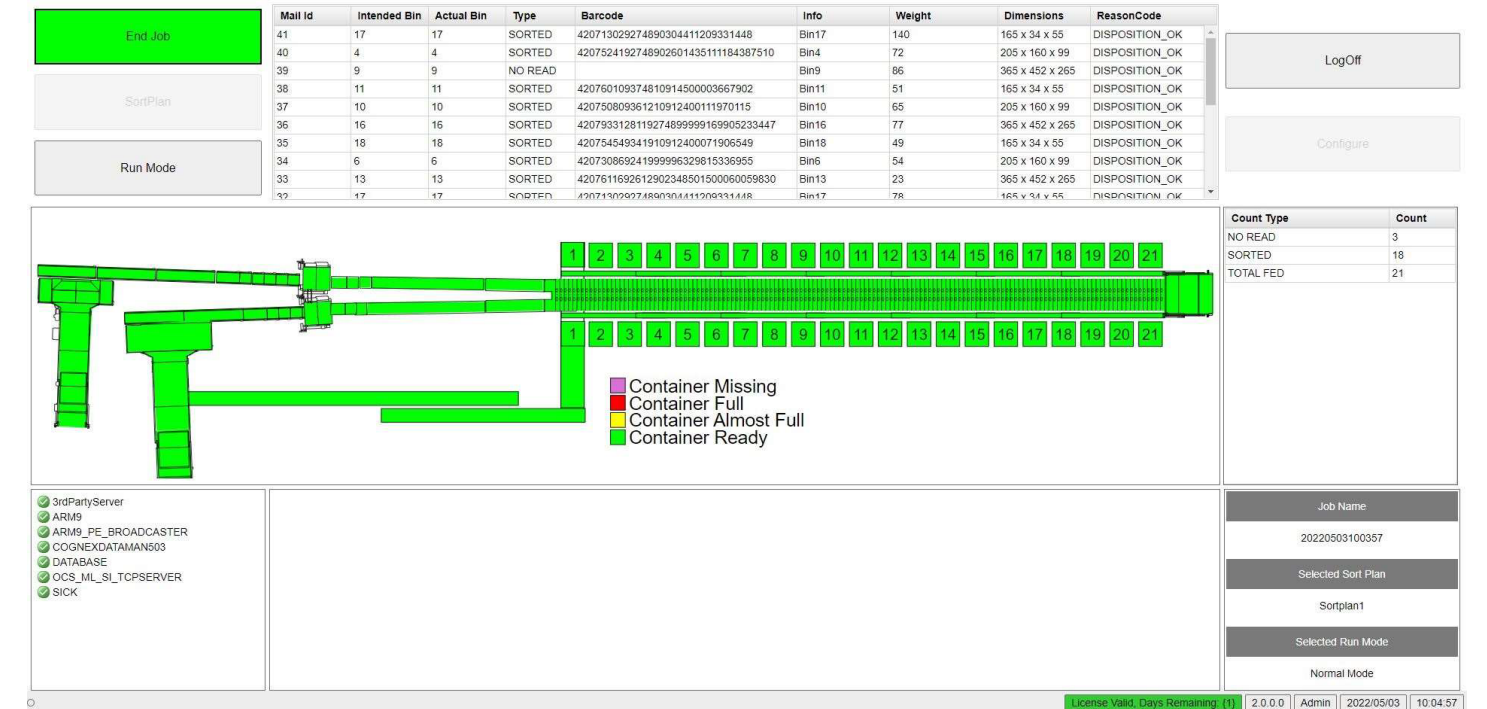

Oasis Sorting Logistics Software

Web Based Software

Oasis is NPI's proprietary web-based software program developed with ease-of-use and simplicity in mind. The software is designed to improve the logistics of your operation and reduce labor requirements through accurate sorting of parcels. It is easily accessible from anywhere on your company's network, allowing you to access the Oasis interface from your laptop, tablet, or desktop computer. Oasis features a state-of-the-art productivity display that shows information and statistics in real-time for the Xstream Shoe Sorter. The productivity display shows the current throughput and read rate of your sorter, informing you how many parcels have been sorted per hour.

Live KPI Dashboard

In addition, if your company utilizes a Dual Sided Xstream Sorter, Oasis displays the read rate and percentage of pieces sorted for each side of the sorter. It includes on-screen alerts such as eStop notifications, bin full notifications, and bin present notifications. Starting from the installation of your sorter and onwards, NPI's dedicated software and service team will expertly configure and optimize a sorting plan that aligns with your company's needs, effectively improving accuracy and speed while simultaneously generating a return on investment.

Simple User Interface with parcel sortation data

Features and Benefits

A **DURAVANT** COMPANY

888-821-SORT

NPI is a proven leader in automated sorting solutions. For over 45 years, our automated solutions have set the standard for affordable, high-speed, low-maintenance automated parcel and letter sorting systems. Our team of experts engineer, design, manufacture, and install sorting systems, offering continued customer support through customizable service plans for preventative maintenance, equipment service, parts, and 24/7 customer support. We manufacture sorters to reduce labor requirements, increase production, and improve operational efficiency for sorting letters, flats, and parcels such as polybags, boxes, and difficult irregularly shaped packages. NPI customers are just as diverse as we are, ranging from 3rd party delivery, last-mile, courier services, financial institutions, posts, B2C, pharmaceutical, distribution, e-commerce, and warehouse operations. NPI's automated sorting solutions are expertly engineered to be modular and versatile, a reflection of NPI's unwavering
